

重科齿轮箱，
载领先技术与品质，
化微科技为动力，
与您携手共创新未来！

Zhongke Gearbox,
Quality with leading technology,
Leading technology as motive power,
Create a new brand future with you!

COMPANY INTRODUCTION 公司简介

常州市重科齿轮箱制造有限公司是一家致力于技术、设计开发、生产、机电一体化为一体的综合性企业。主要生产ZLX、ZS、ZK高扭矩系列单螺杆挤出机专用减速机、S2输出双螺杆挤出机专用减速机、密炼、开炼、压延机专用减速机、R系列平行轴减速机、F系列平行轴减速机、K系列斜齿轮减速机、S系列斜齿轮蜗杆减速机。

Changzhou Zhongke Gearboxes Manufacturer Co.,Ltd is a comprehensive enterprise devotes to technology, design and development, produce and electromechanical operation. Mainly products are ZLX&ZS/J series, ZKG high torque series for single screw extruder, S2 series for conical twin-screw extruder, Special gearboxes for rubber machinery, and R/F/S/K series worm speed reducer.

COMPANY PRODUCT DESCRIPTION 产品介绍

常州市重科齿轮箱制造有限公司在2016年隆重推出ZKG系列齿轮箱，该系列齿轮箱借鉴意大利齿轮箱的设计理念和方法并加以改进，专为单螺杆挤出机配套设计的硬齿面齿轮传动装置。该产品外观新颖美观，结构紧凑合理，承载能力强，传动效率高，可以满足长期的无故障运行，使用寿命长。主要零部件寿命大于50000小时，其承载能力与意大利ZPE系列相当。

Changzhou Zhongke Gearbox Manufacturing Co., Ltd. launched ZKG series gearboxes in 2016. This series of gearboxes borrows the design concepts and methods of the Italian Zambello, and is designed for hard-tooth surface gear transmissions designed for single-screw extruders. This series of products are novel and beautiful in appearance, compact and reasonable structure, low noise index, strong bearing capacity, high transmission efficiency, can meet long-term trouble-free operation, oil leakage rate is small, the life of major components is greater than 50,000 hours, its carrying capacity and Italy ZPE series is quite.

- 箱体**
箱体结构在设计时兼顾了吸振降噪的功能。材料采用高品质的铸钢，并进行充分的时效处理。应用先进的加工工艺，从而保证了齿轮箱的源精度以及精度的可保持性。
- CABINET**
The design of the box structure takes into account the function of absorbing noise. The material is made of high-quality cast iron, and the full-time treatment is applied. The advanced processing technology is applied to ensure the high precision of the gear box and the maintainability of the precision.
- 齿轮**
齿轮和轴类材料均采用高品质合金钢17CrNiMo6，经渗碳淬火齿面硬度达HRC58-62，经精密磨齿后，磨齿精度可以达到5级以上（GB/T10095-2001），同时进行齿廓和螺旋线修形，以保证齿轮在负载状态下完美啮合，从而实现低噪音和高效率。
- GEAR**
Gears and shafts are made of high-quality alloy steel 17CrNiMo6. After carburized and quenched, the tooth surface hardness reaches HRC58-62. After precision tooth grinding, the grinding accuracy can reach 5 or more (GB/T10095-2001). The tooth profile and the helix are shaped to ensure perfect engagement of the gears under load, resulting in low noise and high efficiency.
- 轴承**
轴承一般选用国内与国际知名品牌如ZWZ、HRB、LYC、SKF、NSK等（客户也可以指定选用）
- BEARINGS**
Bearings are generally selected domestic and international famous brands such as ZWZ, HRB, LYC, SKF, NSK, etc. (customers can also specify the choice)
- 油封**
油封一般选用进口品牌，如德国的SIMRIT、台湾SOG等（客户也可以指定选用）。
- OIL SEAL**
Oil seals are generally selected from imported brands such as SIMRIT in Germany and SOG in Taiwan (customers can also specify their choice).
